

MT. TAYLOR MINE PERMIT

JUNE 2010 - RENEWAL APPLICATION FOR STANDBY STATUS

MT. TAYLOR MINE
RIO GRANDE RESOURCES CORPORATION
RENEWAL APPLICATION FOR STANDBY STATUS
June 16, 2010
Submitted By J. C. Lister, Mine Manager

**MOUNT TAYLOR MINE
RIO GRANDE RESOURCES APPLICATION FOR RENEWING STANDBY PERMIT
NUMBER C1002RE**

Page 1 of 11

Rio Grande Resources Corporation (RGR) is hereby making application for renewing Standby Permit No. C 1002RE related to the Mt. Taylor Mine, according to the conditions of Permit Revision 98-1 dated December 18, 1998 and for compliance of NMAC 19.10 Part 7 and Subsection 19.10.5.505 of the New Mexico Mining Act Rules. All of the Mine Units listed in the 98-1 Revision are expected to remain on standby for the following 5 years including the Water Treatment Area units. Approval for renewal of standby status and permit modification for was previously approved on July 2005.

On December 18, 1998 the Mining and Minerals Division approved the closeout plan and financial security for the mine as an existing mining operation. Section 19.10.7.701.1 of the Rules states that Standby Status can be continued five or more years. Standby Status more accurately depicts the continued operational status of the mine.

The Mt. Taylor Mine was put on inactive status by the prior owners, Chevron Resources Corporation, in January 1990 due to low uranium market prices. Rio Grande Resources Corporation acquired the Mine property in 1991, and waited for the market conditions to be favorable for startup. Although some improvement in uranium price has occurred over the past five years, sufficient improvement is not expected for another four or five years. Should those changes in the market should occur sooner, RGR stands ready to initiate steps to reactivate the mine. In the mean time, RGR will continue to accept proposals for a long-term water supply project (WSP) to allow portions of the mine facilities to be operational and employ a limited number of people.

GENERAL INFORMATION

The Mt. Taylor Mine is located near San Mateo, New Mexico in the East 1/2 of Section 24, Township 13 N, Range 8 W. Follow State Highway 605 from Milan, New Mexico 22 miles to arrive at San Mateo. The Mine is located approximately one mile northeast of the small village.

The employment level at the mine site has increased to a total of four. The contractors have increased to include five different companies.

The WSP is expected to start up during the following five years, but this cannot be assured as contracts are still being considered with various potential buyers of the water.

**MOUNT TAYLOR MINE
RIO GRANDE RESOURCES APPLICATION FOR RENEWING STANDBY PERMIT
NUMBER C1002RE**

Page 2 of 11

SEVEN MINE SITE UNITS WILL BE ADDRESSED FOR STANDBY

1.0 PLANT SITE UNIT- 93 ACRES

1.1 The Plant Site Unit includes most of the surface mine facilities. There has been no mining activity on the premises since January 1990. Work on the mine site is geared only to maintaining buildings, roads, drainage ditches, containment structures, and security requirements.

19.10.7.701.B(1) Identify the projected term of standby status –

The Plant Site may be on standby for an additional five years or possibly more. Work on the WSP could start as early as permitting allows.

1.2 *19.10.7.701.B(2) Identify the projected term of standby status – Describe the measures to be taken to reduce, to the extent practicable, the formation of acid and other toxic drainage and to prevent releases that cause federal or state environmental standards to be exceeded –*

There will be no acid and/or other toxic drainage off the plant site because none of these chemicals are produced or used even when the mine is operating. Releases of oil and gasoline are prevented by curbed concrete berms or constructed metal tanks beneath the storage tanks. Used oil is collected and transported to Milan, New Mexico to be recycled. Storm water, containing low levels of radioactive contaminants, is managed with, (1) run-off diversion ditches and (2) underground network of 24 inch piping which discharges into a lagoon for evaporation.

1.3 *19.10.7.701.B(3) Describe how applicable federal and state environmental standards and regulations will be met during the duration of standby status and provide to the Director a written determination from the Secretary of the Environment Department stating that the permittee has demonstrated that the operation will be expected to achieve compliance with all applicable air, water quality and other environmental standards of the Environment Department during standby status if carried out as described –*

Applicable Federal and State environmental standards and regulations will be met during the duration of standby status by complying with State Permit DP-61 and Federal Permits NPDES NM 0028100 and NPDES Storm Water Permit NMR05GB27. The NMED has written letters dated May 28, 1999 stating RGR will very likely be in compliance during the Standby period by following the current maintenance program.

The mine area has not been further disturbed since the 1998 mine permit was issued. All conditions described in that permit and in subsequent standby applications were deemed by NMED to be satisfactorily addressed then and have not changed since.

**MOUNT TAYLOR MINE
RIO GRANDE RESOURCES APPLICATION FOR RENEWING STANDBY PERMIT
NUMBER C1002RE**

Page 3 of 11

1.4 *19.10.7.701.B(4) Describe how waste and storage units, leach piles, impoundments and pits will be stabilized during the duration of standby status –*

This paragraph, 19.10.7.701.B4, does not apply to the Plant Site. Although there is no waste and storage units, leach piles, impoundments and pits in the plant site area, there are two vertical shafts, which are now completely enclosed to prevent any person or wildlife entry into the deep excavations, in the unlikely event that the security system is breached.

1.5 *19.10.7.701.B(5) Describe how the applicable requirements of the Act and this Part will be met during the term of the standby status for the operations proposed for standby status –*

RGR will continue to comply with the conditions and provisions of the Mine Permit Application, Mt. Taylor Closeout Plan, provisions and conditions of the Permit Revision 98-1 and will remain in compliance with NMAC-19.10. Part 7 of the New Mexico Mining Rules. The mine area has not been further disturbed since the 1998 mine permit was issued. All conditions described in that permit and in subsequent standby applications were deemed by MMD to be satisfactorily addressed then and have not changed since.

1.6 *19.10.7.701.B(6) Provide an analysis of the anticipated future economic viability of the units proposed for standby status –*

RGR has the largest uranium deposit in the United States, which is well over 100,000,000 pounds of U₃O₈ in the Mt. Taylor Mine ore body. The market price now does not permit a viable mining operation, primarily because of the availability of uranium from weapons decommissioning in the world and U. S. markets. However, such material will be used up after a period of time, after which market demand for new uranium oxide should increase. Additionally, in the future the demand for clean nuclear power generating plants will increase as low-cost coal reserves are depleted and demand for electric power increases. These conditions and the high grade ore reserves at Mt. Taylor will increase the value of the Mt. Taylor Mine and lead to resumption of operations in the relatively near future.

2.0 OLD WASTE ROCK PILE - 15.2 ACRES

2.1 *19.10.7.701.B(1) Identify the projected term of standby status –*

The old waste pile will be on standby for possibly another 5 years. However, if the mine should go into production earlier because of uranium price correction, the old waste pile will be put into use.

2.2 *19.10.7.701.B(2) Describe the measures to be taken to reduce, to the extent practicable, the formation of acid and other toxic drainage and to prevent releases that cause federal or state environmental standards to be exceeded –*

**MOUNT TAYLOR MINE
RIO GRANDE RESOURCES APPLICATION FOR RENEWING STANDBY PERMIT
NUMBER C1002RE**

Page 4 of 11

There is no acid generation or toxic waste accumulation in the old waste pile as shown by analysis of waste rock samples.

2.3 19.10.7.701.B(3) Describe how applicable federal and state environmental standards and regulations will be met during the duration of standby status and provide to the Director a written determination from the Secretary of the Environment Department stating that the permittee has demonstrated that the operation will be expected to achieve compliance with all applicable air, water quality and other environmental standards of the Environment Department during standby status if carried out as described –

The waste pile has been unused for approximately 20 years. There is no indication that the rock pile is any danger to humans or wildlife. Precipitation run-off is captured and collected in a containment basin for evaporation where solids remain confined. Wind blown particulates are at a minimum due to the clay content in the waste rock. There are no other regulations on waste rock piles that are a concern of state agencies.

The mine area has not been further disturbed since the 1998 mine permit was issued. All conditions described in that permit and in subsequent standby applications were deemed by NMED to be satisfactorily addressed then and have not changed since.

2.4 19.10.7.701.B(4) Describe how waste and storage units, leach piles, impoundments and pits will be stabilized during the duration of standby status –

The old waste pile is stabilized during standby by diversion of runoff, capture of sediment from the slopes, and prevention of saturation within the pile. Minor erosion is occurring, but is collected in a containment basin along with the run-off. The pile slopes have remained stable, without mass movement, for 20 years.

2.5 19.10.7.701.B(5) Describe how the applicable requirements of the Act and this Part will be met during the term of the standby status for the operations proposed for standby status –

RGR will continue to comply with the conditions and provisions of the Mine Permit Application, Mt. Taylor Closeout Plan, provisions and conditions of the Permit Revision 98-1 and will remain in compliance with NMAC-19.10. Part 7 of the New Mexico Mining Rules. The mine area has not been further disturbed since the 1998 mine permit was issued. All conditions described in that permit and in subsequent standby applications were deemed by MMD to be satisfactorily addressed then and have not changed since.

2.6 19.10.7.701.B(6) Provide an analysis of the anticipated future economic viability of the units proposed for standby status –

See paragraph 1.6 above.

**MOUNT TAYLOR MINE

NUMBER C1002RE**

Page 5 of 11

3.0 NEW ROCK WASTE PILE - 21.7 ACRES

3.1 *19.10.7.701.B(1) Identify the projected term of standby status –*

The New Waste Rock pile area has not been disturbed except for test pits to determine shale quality. Therefore, the area will be on standby until needed for waste rock disposal.

3.2 *19.10.7.701.B(2) Describe the measures to be taken to reduce, to the extent practicable, the formation of acid and other toxic drainage and to prevent releases that cause federal or state environmental standards to be exceeded –*

No acid generation potential or toxic waste accumulation.

3.3 *19.10.7.701.B(3) Describe how applicable federal and state environmental standards and regulations will be met during the duration of standby status and provide to the Director a written determination from the Secretary of the Environment Department stating that the permittee has demonstrated that the operation will be expected to achieve compliance with all applicable air, water quality and other environmental standards of the Environment Department during standby status if carried out as described –*

The mine area has not been further disturbed since the 1998 mine permit was issued. All conditions described in that permit and in subsequent standby applications were deemed by NMED to be satisfactorily addressed then and have not changed since.

3.4 *19.10.7.701.B(4) Describe how waste and storage units, leach piles, impoundments and pits will be stabilized during the duration of standby status –*

See responses to 3.1 and 3.3 above.

3.5 *19.10.7.701.B(5) Describe how the applicable requirements of the Act and this Part will be met during the term of the standby status for the operations proposed for standby status –*

RGR will continue to comply with the conditions and provisions of the Mine Permit Application, Mt. Taylor Closeout Plan, provisions and conditions of the Permit Revision 98-1 and will remain in compliance with NMAC-19.10. Part 7 of the New Mexico Mining Rules. The mine area has not been further disturbed since the 1998 mine permit was issued. All conditions described in that permit and in subsequent standby applications were deemed by MMD to be satisfactorily addressed then and have not changed since.

3.6 *19.10.7.701.B(6) Provide an analysis of the anticipated future economic viability of the units proposed for standby status –*

RGR refers you to the Plant Site Unit in paragraph 1.6

**MOUNT TAYLOR MINE
RIO GRANDE RESOURCES APPLICATION FOR RENEWING STANDBY PERMIT
NUMBER C1002RE**

Page 6 of 11

4.0 WATER TREATMENT AREA - 28 ACRES

4.1 *19.10.7.701.B(1) Identify the projected term of standby status –*

The water treatment area will be on standby until the WSP is agreed upon by all parties. The WSP might be activated within the next five years. Prior to pumping water, redesign construction work will be necessary to prepare the lagoons and upgrade the treatment facilities to achieve drinking water standards of water before release from the site.

4.2 *19.10.7.701.B(2) Describe the measures to be taken to reduce, to the extent practicable, the formation of acid and other toxic drainage and to prevent releases that cause federal or state environmental standards to be exceeded –*

There is no acidic or other toxic drainage within or out of the water treatment area.

4.3 *19.10.7.701.B(3) Describe how applicable federal and state environmental standards and regulations will be met during the duration of standby status and provide to the Director a written determination from the Secretary of the Environment Department stating that the permittee has demonstrated that the operation will be expected to achieve compliance with all applicable air, water quality and other environmental standards of the Environment Department during standby status if carried out as described –*

The water treatment area has been void of activity for approximately 20 years. Quarterly inspections of the lagoons and buildings are made to assure the buildings, equipment, and lagoon berms are maintained for future operation. All lagoons remain dry except for lagoon #2 which receives run-off from the plant site area. The NMED has written letters dated May 28, 1999 stating RGR will very likely be in compliance during the standby period by following the current maintenance program. The mine area has not been further disturbed since the 1998 mine permit was issued. All conditions described in that permit and in subsequent standby applications were deemed by NMED to be satisfactorily addressed then and have not changed since.

4.4 *19.10.7.701.B(4) Describe how waste and storage units, leach piles, impoundments and pits will be stabilized during the duration of standby status –*

The lagoons in the water treatment area, eight in all, have shown only very minor berm deterioration since shut down in June 1990. Due to the very dry environment, water erosion has not caused damage to these facilities. The security fence around the area has discouraged wildlife or domestic animals (except cattle actually brought in for grass and weed control for part of the year - usually four) from entering and causing accelerated water erosion. Annual precipitation averages between eight to ten inches per year.

4.5 *19.10.7.701.B(5) Describe how the applicable requirements of the Act and this Part will be met during the term of the standby status for the operations proposed for standby status –*

**MOUNT TAYLOR MINE
RIO GRANDE RESOURCES APPLICATION FOR RENEWING STANDBY PERMIT
NUMBER C1002RE**

Page 7 of 11

RGR will continue to comply with the conditions and provisions of the Mine Permit Application, Mt. Taylor Closeout Plan, provisions and conditions of the Permit Revision 98-1 and will remain in compliance with NMAC-19.10. Part 7 of the New Mexico Mining Rules. The mine area has not been further disturbed since the 1998 mine permit was issued. All conditions described in that permit and in subsequent standby applications were deemed by MMD to be satisfactorily addressed then and have not changed since.

4.6 *19.10.7.701.B(6) Provide an analysis of the anticipated future economic viability of the units proposed for standby status –*

The water treatment area is a necessary facility, whether it is used for mining or only for the WSP. It is anticipated that the water treatment area will treat 2000 to 4000 acre feet of water annually. The treated water will be released into a pipeline (to be provided by others and permitted separately) for transport to one or more water users. The WSP is projected to provide positive financial returns for RGR.

5.0 ORE STOCKPILE - 6.8 ACRES

5.1 *19.10.7.701.B(1) Identify the projected term of standby status –*

The low grade ore stockpile will be on standby until the mine resumes operation. The standby period is expected to be five years, unless uranium markets improve sooner.

5.2 *19.10.7.701.B(2) Describe the measures to be taken to reduce, to the extent practicable, the formation of acid and other toxic drainage and to prevent releases that cause federal or state environmental standards to be exceeded –*

The low-grade stockpile was covered with uncontaminated soil and rock in 1992. This pile cover shows only minor erosional features, mainly because the cover has developed considerable natural vegetation over the last 18 years. The vegetation cover is expected to improve each year during the standby period.

5.3 *19.10.7.701.B(3) Describe how applicable federal and state environmental standards and regulations will be met during the duration of standby status and provide to the Director a written determination from the Secretary of the Environment Department stating that the permittee has demonstrated that the operation will be expected to achieve compliance with all applicable air, water quality and other environmental standards of the Environment Department during standby status if carried out as described –*

Drainage from the low-grade stockpile area is collected in a collection basin specifically constructed to collect and retain run-off from the low-grade stockpile and the acreage around the stockpile. The NMED agrees that this area will not produce air or water contaminated discharge during the standby period as stated in letters dated May 28, 1999.

**MOUNT TAYLOR MINE
RIO GRANDE RESOURCES APPLICATION FOR RENEWING STANDBY PERMIT
NUMBER C1002RE**

Page 8 of 11

The mine area has not been further disturbed since the 1998 mine permit was issued. All conditions described in that permit and in subsequent standby applications were deemed by NMED to be satisfactorily addressed then and have not changed since.

5.4 *19.10.7.701.B(4) Describe how waste and storage units, leach piles, impoundments and pits will be stabilized during the duration of standby status –*

The one impoundment in the low-grade stockpile area is inspected each quarter to assure berms and drainage remains in good order. The berms of the impoundment are heavily vegetated and mostly free from cattle and wildlife damage. This facility will be maintained during the standby period in a manner approved by NMED.

5.5 *19.10.7.701.B(5) Describe how the applicable requirements of the Act and this Part will be met during the term of the standby status for the operations proposed for standby status –*

RGR will continue to comply with the conditions and provisions of the Mine Permit Application, Mt. Taylor Closeout Plan, provisions and conditions of the Permit Revision 98-1 and will remain in compliance with NMAC-19.10. Part 7 of the New Mexico Mining Rules. The mine area has not been further disturbed since the 1998 mine permit was issued. All conditions described in that permit and in subsequent standby applications were deemed by MMD to be satisfactorily addressed then and have not changed since.

5.6 *19.10.7.701.B(6) Provide an analysis of the anticipated future economic viability of the units proposed for standby status –*

See paragraph 1.6 above.

6.0 STORM WATER RETENTION POND - WASTE PILE (2.1 ACRES)

6.1 *19.10.7.701.B(1) Identify the projected term of standby status –*

Drainage from the waste pile area is collected in a collection basin specifically constructed to collect and retain run-off from the waste pile and the acreage around the waste pile. The NMED agrees that this area will not produce air or water contaminated discharge during the standby period as stated in letters dated May 28, 1999.

6.2 *19.10.7.701.B(2) Describe the measures to be taken to reduce, to the extent practicable, the formation of acid and other toxic drainage and to prevent releases that cause federal or state environmental standards to be exceeded –*

There is no acidic or other toxic drainage from this unit. The storm water run-off from the old waste pile is directed into this basin where the water is evaporated leaving suspended solids on the floor.

**MOUNT TAYLOR MINE
RIO GRANDE RESOURCES APPLICATION FOR RENEWING STANDBY PERMIT
NUMBER C1002RE**

Page 9 of 11

6.3 *19.10.7.701.B(3) Describe how applicable federal and state environmental standards and regulations will be met during the duration of standby status and provide to the Director a written determination from the Secretary of the Environment Department stating that the permittee has demonstrated that the operation will be expected to achieve compliance with all applicable air, water quality and other environmental standards of the Environment Department during standby status if carried out as described –*

The waste pile run-off impoundment was constructed in 1989 to receive water and silt from any erosion which may occur on the slopes of the waste pile. At present, the basin is still in very good condition and continues to collect run-off from the infrequent heavy rains. The waste pile is inspected on a quarterly basis. NMED approved this facility as stated in letters written May 28, 1999. The mine area has not been further disturbed since the 1998 mine permit was issued. All conditions described in that permit and in subsequent standby applications were deemed by NMED to be satisfactorily addressed then and have not changed since.

6.4 *19.10.7.701.B(4) Describe how waste and storage units, leach piles, impoundments and pits will be stabilized during the duration of standby status –*

This collection impoundment has been in use for approximately 20 years. There have been no serious erosion problems nor has there been any danger that this impoundment would be filled to capacity so as to threaten breach of any one of the containment berms. Vegetation cover on the berms and the floor of the basin has allowed only minor erosion features. This facility is inspected once per calendar quarter for damage and, if necessary, repairs are scheduled.

6.5 *19.10.7.701.B(5) Describe how the applicable requirements of the Act and this Part will be met during the term of the standby status for the operations proposed for standby status –*

RGR will continue to comply with the conditions and provisions of the Mine Permit Application, Mt. Taylor Closeout Plan, provisions and conditions of the Permit Revision 98-1 and will remain in compliance with NMAC-19.10. Part 7 of the New Mexico Mining Rules. The mine area has not been further disturbed since the 1998 mine permit was issued. All conditions described in that permit and in subsequent standby applications were deemed by MMD to be satisfactorily addressed then and have not changed since.

6.6 *19.10.7.701.B(6) Provide an analysis of the anticipated future economic viability of the units proposed for standby status –*

RGR refers you to Paragraph 1.6 for more details.

**MOUNT TAYLOR MINE
RIO GRANDE RESOURCES APPLICATION FOR RENEWING STANDBY PERMIT
NUMBER C1002RE**

Page 10 of 11

7.0 STORM WATER RETENTION POND - LOW ORE GRADE PILE (1.6 ACRES)

7.1 *19.10.7.701.B(1) Identify the projected term of standby status –*

This unit will be on standby for another 5 years.

7.2 *19.10.7.701.B(2) Describe the measures to be taken to reduce, to the extent practicable, the formation of acid and other toxic drainage and to prevent releases that cause federal or state environmental standards to be exceeded –*

There is no acidic or other toxic drainage from the impoundment. This pond was constructed in 1979 and is in very good condition because of low water levels and good vegetation cover on the outer berm surfaces. Very little erosion is evident on either side of the berms. The floor of the basin is covered with one to two feet of shale to prevent percolation of water and contaminants.

7.3 *19.10.7.701.B(3) Describe how applicable federal and state environmental standards and regulations will be met during the duration of standby status and provide to the Director a written determination from the Secretary of the Environment Department stating that the permittee has demonstrated that the operation will be expected to achieve compliance with all applicable air, water quality and other environmental standards of the Environment Department during standby status if carried out as described –*

This facility has been collecting surface water from the ore pad for approximately 30 years with no evidence of ground water contamination. This history should be sufficiently favorable to allow NMED to give approval for extended standby operation.

The mine area has not been further disturbed since the 1998 mine permit was issued. All conditions described in that permit and in subsequent standby applications were deemed by NMED to be satisfactorily addressed then and have not changed since.

7.4 *19.10.7.701.B(4) Describe how waste and storage units, leach piles, impoundments and pits will be stabilized during the duration of standby status –*

This impoundment is stabilized with clay and silt floor to prevent ground water contamination and has vegetation cover on the berms to control erosion. Security fencing also limits the damage done by domestic and wild animals.

7.5 *19.10.7.701.B(5) Describe how the applicable requirements of the Act and this Part will be met during the term of the standby status for the operations proposed for standby status –*

RGR will continue to comply with the conditions and provisions of the Mine Permit Application, Mt. Taylor Closeout Plan, provisions and conditions of the Permit Revision 98-1 and will remain in compliance with NMAC-19.10. Part 7 of the New Mexico Mining Rules.

**MOUNT TAYLOR MINE

The mine area has not been further disturbed since the 1998 mine permit was issued. All conditions described in that permit and in subsequent standby applications were deemed by MMD to be satisfactorily addressed then and have not changed since.

7.6 *19.10.7.701.B(6) Provide an analysis of the anticipated future economic viability of the units proposed for standby status –*

See paragraph 1.6 above.

8.0 19.10.7.701. C and F - REVISION FEES FOR STANDBY STATUS

8.1 RGR will submit the \$5000.00 fee as required by NMAC 19.10.2.201.J.

9.0 19.10.7.701.C - NOTICES PURSUANT TO 19.10.9 NMAC

9.1 This notice has been distributed according to NM Mining Act Rules, subsection 19.10.9.903 A through D. Proof of distribution is included on the last pages.

10.0 19.10.7.701.F - AGREEMENTS WITH NEW MEXICO ENERGY, MINERALS AND MINING DIVISION

10.1 *19.10.7.701.F(1)* RGR agrees to take measures to reduce, to the extent practicable, the formation of acid and other toxic drainage and to prevent releases that cause federal or state environmental standards to be exceeded.

10.2 *19.10.7.701.F(2)* RGR agrees to meet applicable Federal and State environmental standards and regulations during the period of standby status consistent with subsections 1.0, 2.0, 3.0, 4.0 5.0, 6.0 and 7.0 of this application.

10.3 *19.10.7.701.F(3)* RGR agrees to stabilize waste and storage units and impoundments during the standby period consistent with subsections 1.0, 2.0, 3.0, 4.0, 5.0, 6.0, and 7.0 of this application.

10.4 *19.10.7.701.F(4)* RGR agrees to comply with the applicable requirements of the Act, this Part and the permit during the term of standby status.

11.0 19.10.7.701.G - Mine Close-out Plan

On December 18, 1998 the Mining and Minerals Division approved the closeout plan and financial security for the mine as an existing mining operation.

PUBLIC NOTICE (ENGLISH VERSION)**

LEGAL NOTICE

Rio Grande Resources Corporation (RGR) submitted a Standby Status Renewal Application on or before July 5, 2010 as a revision to its existing Mine Permit No. C1002RE, for its Mt. Taylor Mine in accordance with the provisions of the New Mexico Mining Act, sections 60-1 through 69-36.20, NMSA 1978, as amended, and the New Mexico Mining Act Rules (Rules), 19.10.5 and 19.10.7 of the New Mexico Administrative Code (NMAC).

The Mt. Taylor Mine is located in Section 24, T13N, R8W, NMPM in Cibola County, near the village of San Mateo. The mine is an existing uranium mining operation using underground mining techniques to extract uranium ore from depths of over 3000 feet below ground surface using room-and-pillar and stope mining methods. There are no milling facilities within the proposed Standby area. Uranium ore was first produced from the Mt. Taylor Mine in 1979 until September 30, 1982 and again from October 1985 until January 1990. The Mine has been inactive since January 1990 until the present. Standby Status is a technical change only and does not indicate a change in the intended mining activity at the mine. Standby Status was originally approved by the Mining and Minerals Division (MMD) of the New Mexico Energy, Minerals & Natural Resources Department (EMNRD) on October 7, 1999 for a 5 year term. Standby Status was renewed on July 5, 2005 for an additional 5 year term. The current application is for renewal of Standby Status for an additional 5 year term.

The proposed Standby Status Renewal Application includes the plant site and mine support surface facilities consisting of Seven (7) mining units which are: (1) Plant Site - 93 Acres, (2) Old Waste Pile - 15.2 Acres, (3) New Waste Pile 21.7 - Acres, (4) Water Treatment Area - 28 Acres, (5) Low Grade Stockpile Area - 6.8 Acres, (6) Storm Water Retention Pond - Waste Pile - 2.1 Acres, and (7) Storm water Retention Pond - Low Grade Stockpile - 1.6 Acres. The Rules require Standby Status to be approved by the EMNRD and requires this Standby Status Renewal Application to be processed.

The Applicant's Address:

Mt. Taylor Mine
Rio Grande Resources Corporation
P. O. Box 1150
Grants, New Mexico 87020

A copy of the Standby Status Application is available for public inspection at the Public Library in Grants, New Mexico and also at the MMD offices at the address below.

The application may also be viewed on the MMD website at:

<http://www.emnrd.state.nm.us/MMD/MARP/MARPMainPage.htm>

(Click on Pending Permit Applications, then scroll down to Pending Mine Applications, Regular Existing)

Written comments may be submitted to:

Director, Mining and Minerals Division
Energy, Minerals and Natural Resources Department
1220 South St. Francis Dr.
Santa Fe, New Mexico 87505

Procedure Requesting a Hearing

Any interested person may request that the Director conduct a public hearing on the proposed Permit Revision. Such request must be made to the Director (see address above) within 30 days of the date of the newspaper publication of the notice of the Standby Status Renewal Application unless the Director determines a longer period in which to make the request is appropriate and such period is specified in the published notice. If a hearing is timely requested, the Director shall set a hearing unless the request is clearly frivolous. The Director may hold a public hearing absent of any request.

Procedure for Submitting Comments

All interested persons may submit written comments regarding the Standby Status Renewal Application to the Director. Written comments must be received by the Director prior to the close of the hearing record following any public hearing that is held. If no public hearing is held, written comments will be considered only if they are received by the Director within 60 days after the newspaper publication of the notice of the Permit Revision or within 60 days after the person filing the comment received notice of the Revision, whichever is later.

**ATTACHMENT 2
PUBLIC NOTICE (SPANISH VERSION)**

NOTIFICACION LEGAL

Río Grande Resources Corporation (RGR) consignó la Aplicación de Renovación de su Status en Espera el día 5 de Julio del 2010, o antes de la mencionada fecha, como una revisión de su existente Permiso de Mina No. C1002RE, para su Mina Mt. Taylor en conformidad con las disposiciones de la Ley de Minas de Nuevo México, secciones 60-1 hasta la 69-36.20, NMSA 1978, modificada y la normas de la Ley Minera de Nuevo México números 19.10.5 y 19.10.7 del Código Administrativo de Nuevo México (NMAC-siglas en Ingles).

La Mina Mt. Taylor esta localizada en la Sección 24, T13N, R8W, NMPM del Condado de Cibola, cerca de la villa de San Mateo. La mina posee operaciones mineras de extracción de Uranio empleando técnicas mineras subterráneas para la extracción de Uranio mineral (en estado natural, sin procesar) a profundidades de mas de 3000 pies debajo de la superficie del suelo empleando los métodos de minería del Cuarto-Columna (excavación en planos horizontales) y la excavación escalonada. No hay equipos de molienda (trituration) dentro de la propuesta área de espera y/o reserva. El Uranio mineral fue producido por primera vez en la Mina Mt. Taylor desde 1979 hasta el 30 de Septiembre de 1982 y posteriormente desde Octubre de 1985 hasta Enero de 1990. La Mina ha estado inactiva desde Enero de 1990 hasta el presente. El Estatus de Espera (o estar preparado para) es un solo un cambio técnico y este no indica un cambio en la actividad de minería previsto para la mina. El Estatus de Espera fue originalmente aprobado por la División de Minería y Minerales (MMD - siglas en Ingles) del Departamento de Energía, Recursos Naturales y Minerales de Nuevo México (EMNRD - siglas en Ingles) en Octubre 7 del 1999 por un periodo de 5 años. El Estatus de Espera fue renovado el 5 de Julio del 2005 por un periodo adicional de 5 años. La presente aplicación es para la renovación del Estatus en Espera por un periodo adicional de 5 años.

La propuesta de la Aplicación de Renovación de su Estatus en Espera incluye el sitio de la planta y la infraestructura de soporte de superficie de la mina la cual consta de siete (7) unidades de minería, las cuales son: (1)Sitio de la Planta - 93 Acres, (2) Viejo Apilamiento de Residuos - 15.2 Acres, (3) Nuevo Apilamiento de Residuos - 21.7 Acres, (4) Área de Tratamiento de Agua - 28 Acres, (5) Área de Almacenamiento de Bajo Grado- 6.8 Acres, (6) Laguna de Retención de Aguas de Lluvias – Apilamiento de Residuos - 2.1 Acres, y (7) Laguna de Retención de Aguas de Lluvias – Almacenamiento de Bajo Grado - 1.6 Acres. La norma requiere que el estatus de Espera sea aprobado por el EMNRD y requiere que la Aplicación de Renovación de su Status en Espera sea procesada.

Dirección del Aplicante:

Mina Mt. Taylor
Río Grande Resources Corporation
P. O. Box 1150
Grants, Nuevo México 87020

Una copia de la Aplicación de Renovación de Status en Espera esta disponible en la Biblioteca Publica de Grants, Nuevo México para revisión pública y adicionalmente en las oficinas de la MMD en la dirección mostrada a continuación.

Adicionalmente la aplicación puede ser revisada en la página Web del MMD:

<http://www.emnrd.state.nm.us/MMD/MARPMainPage.htm>

(Click en Permisos de Aplicaciones Pendientes, luego darle el cursor hacia abajo hasta Aplicaciones de Minas Pendientes, Existentes Regulares)

Comentarios por escrito pueden ser consignados al:

Director, División de Minería y Minerales
Departamento de Energía, Recursos Naturales y Minerales
1220 Sur St. Francis Drive
Santa Fe, Nuevo México 87505

Procedimiento para solicitar una Audiencia

Cualquier persona interesada puede solicitar al Director que convoque a una audiencia pública en la propuesta de Revisión del Permiso. Esta solicitud de audiencia se debe hacer con el Director (ver dirección arriba) dentro de 30 días de la fecha de publicación en el periódico de Aplicación de Renovación de Status en Espera, a menos que el Director determine un periodo apropiado mas largo en el cual se puede hacer la petición y este periodo debe ser especificado en un aviso publico. Si la audiencia es considerada a tiempo, el Director concretara la audiencia a menos que la petición no contenga un basamento específico. El Director puede poner en espera cualquier audiencia pública.

Procedimiento para Consignar Comentarios

Todas las personas interesadas pueden consignar comentarios relacionados con la Aplicación de Renovación de Status en Espera al Director. Cometarios por escrito deben ser recibidos por el Director antes de cerrar las pruebas de audiencias seguidas por cualquier audiencia pública que ha sido puesta en espera. Si ninguna audiencia publica ha sido puesta en espera, cometarios por escritos serán considerados solo si estos son recibidos por el Director dentro de 60 días de la fecha de publicación en el periódico de noticia de Revisión de Permiso o dentro de 60 días después que la persona introduzca los comentarios recibidos de la notificación de Revisión, cualquier de las dos que sea mas tardía.

Afghan adults now addicted, according to a U.N. report released Monday. opium and heroin have become more entrenched in the lives of ordinary Afghans,

Afghanistan's drug problem is not only seen on the streets of Moscow, London or Paris. It also give opium to their children to quiet them, the report says.

NOTIFICACION LEGAL

Río Grande Resources Corporation (RGR) consignó la Aplicación de Renovación de su Status en Espera el día 5 de Julio del 2010, o antes de la mencionada fecha, como una revisión de su existente Permiso de Mina No. C1002RE, para su Mina Mt. Taylor en conformidad con las disposiciones de la Ley de Minas de Nuevo México, secciones 60-1 hasta la 69-36.20, NMSA 1978, modificada y la normas de la Ley Minera de Nuevo México números 19.10.5 y 19.10.7 del Código Administrativo de Nuevo México (NMAC-siglas en Ingles).

La Mina Mt. Taylor esta localizada en la Sección 24, T13N, R8W, NMPM del Condado de Cibola, cerca de la villa de San Mateo. La mina posee operaciones mineras de extracción de Uranio empleando técnicas mineras subterráneas para la extracción de Uranio mineral (en estado natural, sin procesar) a profundidades de mas de 3000 pies debajo de la superficie del suelo empleando los métodos de minería del Cuarto-Columna (excavación en planos horizontales) y la excavación escalonada. No hay equipos de molienda (trituración) dentro de la propuesta área de espera y/o reserva. El Uranio mineral fue producido por primera vez en la Mina Mt. Taylor desde 1979 hasta el 30 de Septiembre de 1982 y posteriormente desde Octubre de 1985 hasta Enero de 1990. La Mina ha estado inactiva desde Enero de 1990 hasta el presente. El Status de Espera (o estar preparado para) es un solo un cambio técnico y este no indica un cambio en la actividad de minería previsto para la mina. El Status de Espera fue originalmente aprobado por la División de Minería y Minerales (MMD - siglas en Ingles) del Departamento de Energía, Recursos Naturales y Minerales de Nuevo México (EMNRD - siglas en Ingles) en Octubre 7 del 1999 por un periodo de 5 años. El Status de Espera fue renovado el 5 de Julio del 2005 por un periodo adicional de 5 años. La presente aplicación es para la renovación del Status en Espera por un periodo adicional de 5 años.

La propuesta de la Aplicación de Renovación de su Status en Espera incluye el sitio de la planta y la infraestructura de soporte de superficie de la mina la cual consta de siete (7) unidades de minería, las cuales son: (1) Sitio de la Planta - 93 Acres, (2) Viejo Apilamiento de Residuos - 15.2 Acres, (3) Nuevo Apilamiento de Residuos - 21.7 Acres, (4) Área de Tratamiento de Agua - 28 Acres, (5) Área de Almacenamiento de Bajo Grado- 6.8 Acres, (6) Laguna de Retención de Aguas de Lluvias - Apilamiento de Residuos - 2.1 Acres, y (7) Laguna de Retención de Aguas de Lluvias - Almacenamiento de Bajo Grado - 1.6 Acres. La norma requiere que el status de Espera sea aprobado por el EMNRD y requiere que la Aplicación de Renovación de su Status en Espera sea procesada.

Grants, Nuevo México 87020

Una copia de la Aplicación de Renovación de Status en Espera esta disponible en la Biblioteca Publica de Grants, Nuevo México para revisión pública y adicionalmente en las oficinas de la MMD en la dirección mostrada a continuación.

Adicionalmente la aplicación puede ser revisada en la página Web del MMD:
<http://www.emnrd.state.nm.us/MMD/MARPMMainPage.htm>
(Click en Permisos de Aplicaciones Pendientes, luego darle el cursor hacia abajo hasta Aplicaciones de Minas Pendientes, Existentes Regulares)

Comentarios por escrito pueden ser consignados al:
Director, División de Minería y Minerales
Departamento de Energía, Recursos Naturales y Minerales
1220 Sur St. Francis Drive
Santa Fe, Nuevo México 87505

Procedimiento para solicitar una Audiencia

Cualquier persona interesada puede solicitar al Director que convoque a una audiencia pública en la propuesta de Revisión del Permiso. Esta solicitud de audiencia se debe hacer con el Director (ver dirección arriba) dentro de 30 días de la fecha de publicación en el periódico de Aplicación de Renovación de Status en Espera, a menos que el Director determine un periodo apropiado mas largo en el cual se puede hacer la petición y este periodo debe ser especificado en un aviso publico. Si la audiencia es considerada a tiempo, el Director concretara la audiencia a menos que la petición no contenga un basamento específico. El Director puede poner en espera cualquier audiencia pública.

Procedimiento para Consignar Comentarios

Todas las personas interesadas pueden consignar comentarios relacionados con la Aplicación de Renovación de Status en Espera al Director. Comentarios por escrito deben ser recibidos por el Director antes de cerrar las pruebas de audiencias seguidas por cualquier audiencia pública que ha sido puesta en espera. Si ninguna audiencia publica ha sido puesta en espera, comentarios por escritos serán considerados solo si estos son recibidos por el Director dentro de 60 días de la fecha de publicación en el periódico de noticia de Revisión de Permiso o dentro de 60 días después que la persona introduzca los comentarios recibidos de la notificación de Revisión, cualquier de las dos que sea mas tardía.

LEGAL NOTICE

Río Grande Resources Corporation (RGR) submitted a Standby Status Renewal Application on or before July 5, 2010 as a revision to its existing Mine Permit No. C1002RE, for its Mt. Taylor Mine in accordance with the provisions of the New Mexico Mining Act, sections 60-1 through 69-36.20, NMSA 1978, as amended, and the New Mexico Mining Act Rules (Rules), 19.10.5 and 19.10.7 of the New Mexico Administrative Code (NMAC).

The Mt. Taylor Mine is located in Section 24, T13N, R8W, NMPM in Cibola County, near the village of San Mateo. The mine is an existing uranium mining operation using underground mining techniques to extract uranium ore from depths of over 3000 feet below ground surface using room-and-pillar and stope mining methods. There are no milling facilities within the proposed Standby area. Uranium ore was first produced from the Mt. Taylor Mine in 1979 until September 30, 1982 and again from October 1985 until January 1990. The Mine has been inactive since January 1990 until the present. Standby Status is a technical change only and does not indicate a change in the intended mining activity at the mine. Standby Status was originally approved by the Mining and Minerals Division (MMD) of the New Mexico Energy, Minerals & Natural Resources Department (EMNRD) on October 7, 1999 for a 5 year term. Standby Status was renewed on July 5, 2005 for an additional 5 year term. The current application is for renewal of Standby Status for an additional 5 year term.

The proposed Standby Status Renewal Application includes the plant site and mine support surface facilities consisting of Seven (7) mining units which are: (1) Plant Site - 93 Acres, (2) Old Waste Pile - 15.2 Acres, (3) New Waste Pile 21.7 - Acres, (4) Water Treatment Area - 28 Acres, (5) Low Grade Stockpile Area - 6.8 Acres, (6) Storm Water Retention Pond - Waste Pile - 2.1 Acres, and (7) Storm water Retention Pond - Low Grade Stockpile - 1.6 Acres. The Rules require Standby Status to be approved by the EMNRD and requires this Standby Status Renewal Application to be processed.

Santa Fe, New Mexico 87505

Procedure Requesting a Hearing

Any interested person may request that the Director conduct a public hearing on the proposed Permit Revision. Such request must be made to the Director (see address above) within 30 days of the date of the newspaper publication of the notice of the Standby Status Renewal Application unless the Director determines a longer period in which to make the request is appropriate and such period is specified in the published notice. If a hearing is timely requested, the Director shall set a hearing unless the request is clearly frivolous. The Director may hold a public hearing absent of any request.

Procedure for Submitting Comments

All interested persons may submit written comments regarding the Standby Status Renewal Application to the Director. Written comments must be received by the Director prior to the close of the hearing record following any public hearing that is held. If no public hearing is held, written comments will be considered only if they are received by the Director within 60 days after the newspaper publication of the notice of the Permit Revision or within 60 days after the person filing the comment received notice of the Revision, whichever is later.

Taylor en conformidad con las disposiciones de la Ley de Minas de Nuevo Mexico, secciones 60-1 hasta la 69-36.20, NMSA 1978, modificada y la normas de la Ley Minera de Nuevo Mexico numeros 19.10.5 y 19.10.7 del Código Administrativo de Nuevo Mexico (NMAC-siglas en Ingles).

La Mina Mt. Taylor esta localizada en la Sección 24, T13N, R8W, NMPM del Con dado de Cibola, cerca de la villa de San Mateo. La mina posee operaciones mineras de extracción de Uranio empleando tecnicas mineras subterranas para la extracción de Uranio mineral (en estado natural, sin procesar) a profundidades de mas de 3000 pies debajo de la superficie del suelo empleando los metodos de mineria del Cuarto-Columna (excavación en planos horizontales) y la excavación escalonada. No hay equipos de molienda (trituración), dentro de la propuesta area de espera y/o reserva. El Uranio mineral fue producido por primera vez en la Mina Mt. Taylor desde 1979 hasta el 30 de Septiembre de 1982 y posteriormente desde Octubre de 1985 hasta Enero de 1990. La Mina ha estado inactiva desde Enero de 1990 hasta el presente. El Estatus de Espera (0 estar preparado para) es un solo un cambio tecnico y este no indica un cambio en la actividad de mineria previsto para la mina. El Estatus de Espera fue originalmente aprobado por la División de Minería y Minerales (MMD - siglas en Ingles) del Departamento de Energia, Recursos Naturales y Minerales de Nuevo Mexico (EMNRD - siglas en Ingles) en Octubre 7 del 1999 por un periodo de 5 años. El Estatus de Espera fue renovado el 5 de Julio del 2005 por un periodo adicional de 5 años. La presente aplicación es para la renovacion del Estatus en Espera por un periodo adicional de 5 años.

La propuesta de la Aplicación de Renovación de su Estatus en Espera incluye el sitio de la planta y la infraestructura de soporte de superficie de la mina la cual consta de siete (7) unidades de mineria, las cuales son: (1) Sitio de la Planta - 93 Acres, (2) Viejo Apilamiento de Residuos - 15.2 Acres, (3) Nuevo Apilamiento de Residuos - 21.7 Acres, (4) Area de Tratamiento de Agua - 28 Acres, (5) Area de Almacenamiento de Bajo Grado- 6.8 Acres, (6) Laguna de Retención de Aguas de Lluvias - Apilamiento de Residuos - 2.1 Acres, y (7) Laguna de Retención de Aguas de Lluvias - Almacenamiento de Bajo Grado - 1.6 Acres. La norma requiere que el estatus de Espera sea aprobado por el EMNRD y requiere que la Aplicación de Renovación de su Status en Espera sea procesada.
